Michelle A. Green, MPS, RHIA, FAHIMA, CPC, is an Adjunct Professor in the Health Information Technology Department at Mohawk Valley Community College, Utica, New York. She also teaches in the Health Information Management Department at Mount Wachusett Community College, Gardner, Massachusetts. Ms. Green held the position of SUNY Distinguished Teaching Professor in the Physical and Life Sciences Department at the State University of New York, College of Technology, Alfred, from 1984 through 2016. An active member of the American Academy of Professional Coders (AAPC) and American Health Information Management Association (AHIMA), Ms. Green has been recognized both for her excellence in teaching and for her significant contributions to the Health Information Management profession. She has earned numerous awards, including the State University of New York Chancellor's Award for Excellence in Teaching, Alfred State College's Alumni Association Teacher of the Year, Who's Who Among America's Teachers, and the FORE Triumph Educator Award from the AHIMA. Ms. Green is a Registered Health Information Administrator (RHIA), a Fellow of the American Health Information Management Association (FAHIMA), and a Certified Procedural Coder (CPC). She earned a BS from Daemen College and an MPS degree from Alfred University. Ms. Green has authored three successful books

related to coding and health information management.

It works just fine. Thank you.

great book.

Excellent.

This book didn't come with the access code, and I am needing this access code, for my class. The description of the book said that it came with an access code as well.

I had to have this workbook (goes along with the text) for a course that I am taking. I have found that the text is written for fairly easy reading and comprehension. I do have one minor complaint (if you will) about this workbook (as well as the text), I wish that the author had included example practice as she introduced each new piece of coding throughout the text, rather than waiting until the end of the chapter to inundate the new student with different practice problems. The practice is great, and there is some different practice examples throughout each chapter, but what I am trying to get at is, as each new variation to coding is introduced, do some practice right then and there, instead having to wait until the end of the chapter. I have found that there is so many variables to coding, and which coding environment you may find yourself in, that when it comes to using the workbook (and text) I have to keep going back to refresh my memory as to what coding rule, etc. I need for certain practice problems. That's o.k., it is still good practice, just time consuming. If you need this workbook for a course, do not be afraid of the size or weight of it. Be ready to learn coding and practice all the different areas. Unfortunately, our course is behind in its schedule, so I will not be able to use the entire workbook. Also, it would take more than one semester to get through this workbook, unless this was the only course taken. I would recommend this workbook if you need it. Would I have purchased it on my own? Probably not.

I was looking for a book with the answers to the Chapter questions in the 3-2-1 Code It! textbook. This had no answers so I sent it back immediately. It's crazy that there's no way to check your answers.

I am sad to say this book is aweful....it might had been useful had it an answer key to check

yourself, otherwise you have no direction whatsoever and you would be better off spending your time and money by studying the ICD-CM and ICD-CPT books by themselves.

i loved the shipping (needed for school) thanks
