The 30 Laws Of Money

Synopsis

The 30 Laws of Money is a collection of tried, tested and proven Laws that govern the acquisition of money. The Book is hereby presented as an effective tool for the acquisition of prosperity consciousness that empowers the individual to access any form of material wealth he may desire. The reward for compliance is prosperity. The penalty for violating the Laws is poverty. It is especially valuable when a matriculation from poverty to prosperity is intensely sought. It is written in a baby step approach, for beginners, and for all who want to escape from financial woes. This book has enjoyed a series of successful trials. It has been used as a course of study, for three consecutive years, as a leading program for ambitious entrepreneurs who attend monthly seminars and as a training manual for small business people, it served as a catalyst for accelerated business growth. A test study of the effectiveness of the 30 Laws of Money has also been carried out among three sets of young college graduates and the results were positive and encouraging. It is recommended that you read a Law a day for the next 30 days, in order to achieve maximum results. It takes gradual, daily, unrelenting reading and contemplation for periods beyond twenty-one days to accomplish a paradigm change. You should read the Law for the day upon rising in the morning, around noon, and late in the evening. You will dwell on its relevance to your life, and come up with about five action steps. You should generate a to-do-list; five things you can do, or things you feel led to do. You will work on your list. After 30 days of study and contemplation, you can tell the specific Laws that are holding you back. You will then work on yourself to make the needed adjustments. This is the main reason why a number of readers have reiterated the need to conduct the 30 days reading every month for one year to achieve irreversible transformation. The baby step approach adopted in this book is of immense value for beginners, youths, and all those who desire accelerated improvement in their finances. Baby steps are necessarily imprudent, and may be counterproductive, once periods of infancy are over. Once mastery is achieved, a few of the laws soon become too elementary and obsolete. If you will conduct the 30 days reading, and follow through on the recommendations as suggested, and you repeat this process every month for twelve months, your prosperity will be ensured.
