# Birds Of Aruba, CuraÃ§ao, And Bonaire (Princeton Field Guides)

## Synopsis

Located in the southern Caribbean off the coast of Venezuela, the islands of Aruba, CuraÃ§ao, and Bonaire are home to a colorful diversity of bird species. Birds of Aruba, CuraÃ§ao, and Bonaire is the first comprehensive field guide to the birds of the region and the ideal companion for identifying the islands' remarkable avian population. This compact and portable book contains close to 1,000 superb color illustrations on 71 color plates and detailed descriptions of every species. Concise text on facing pages highlights key identification features, including voice, habitat, behavior, and status. This field guide is essential for all birdwatchers and wildlife enthusiasts interested in this part of the world. First comprehensive field guide to the birds of Aruba, CuraÃ§ao, and Bonaire Complete coverage of the islands' bird species, including residents, migrants, and vagrants Close to 1,000 illustrations on 71 color plates depicting every species and all major plumages and races Concise text on facing pages highlights key identification features, including voice, habitat, behavior, and status

## Customer Reviews

"A must have for those birding the region."--Ian Paulsen, *Birdbooker Report*"This island trio is located just off the coast of South America, but, fascinatingly, the birdlife has a strong West Indian element and includes migrants from the north as well as visitors from the south. (American Redstart, Northern Waterthrush, Ovenbird, and Prothonotary, Blackpoll, and Connecticut warblers occur regularly.) Until this handy book, there was no comprehensive field guide."--*Bird Watching*

## Magazine

Bart de Boer is a Dutch ornithologist. He is the author of "Our Birds: Curacao, Bonaire, Aruba and Our Animals: Curacao, Bonaire, Aruba." Eric Newton is an amateur ornithologist who resides on Curacao. Robin Restall is the principal author and sole illustrator of "Birds of Northern South America."

Used during our trip in February to help identify birds seen. Extremely helpful. There are many birds in Aruba which we do not have in the United States so my birding apps and books were not useful there. this book was great. It shows what the birds look like, and which islands they are found (and not found) on. Also places to bird. While our primary purpose in Aruba was not bird watching, we ended up seeing and enjoying many birds because of this book. If you are a bird watcher and are going to Aruba, you should get this book and take it with you.

While 'some' of the illustrations are not up to the quality of Peterson or much of the Nat'l Geo. guide, they are still good (in some cases VERY good) and the FG is well done and easy to use. It made confirming bird IDs in Aruba much easier. Suggestion for the authors: Perhaps 3 thin lines below the text for each species displaying the monthly distribution of the birds for each island. That would really help. This IS a well done field guide that was indispensable on our last trip, and is well worth buying.

I live on Bonaire and use this book all of the time. Unlike other bird guides for the region, this finely illustrated book concentrates only on the birds of the ABCs. Thus finding the correct ID for a bird that you see is done quickly. This guide also includes species that rarely visit here.

Be aware that the type size is VERY small and the text is quite faint. Other than that, the book looks wonderful. I returned mine, however, because I couldn't read the text without a magnifier.... That's the first time that has ever happened!

Great guide in the Peterson style. This is the only English guide specific to these islands I could find. Good drawing and very complete information.

this is exactly the book that I was looking for! I love being able to ID the birds I have photographed.

The book was a real help when I went to Bonaire. I used the book to photo and identify several species of Bonaire birds.

As a birder this book was very useful for my day excursions while on a cruise! I birded Bonaire and Curacao and got over 50 of the species listed!
