

Hepatitis C E Chart: Full Illustrated

HEPATIC DISEASES

The liver is a large, reddish-brown organ located in the upper right quadrant of the abdomen. It is the largest internal organ in the body and is responsible for many functions, including filtering toxins from the blood, producing bile, and storing energy. The liver is divided into two main lobes, the right lobe and the left lobe. The right lobe is larger and is located on the right side of the body. The left lobe is smaller and is located on the left side of the body. The liver is connected to the gallbladder, which is a small, pear-shaped sac located just below the right lobe of the liver. The gallbladder stores bile, which is produced by the liver. The bile then travels through the gallbladder and into the small intestine, where it is used to digest food. The liver is also connected to the pancreas, which is a small, elongated organ located behind the stomach. The pancreas produces enzymes that are used to digest food. The liver is also responsible for producing and storing glycogen, which is a form of stored energy. The liver is also responsible for producing and storing vitamins and minerals. The liver is a very important organ and is essential for many functions in the body.

RISK FACTORS

- Chronic liver disease, particularly alcoholic liver disease
- Hepatitis B and C
- Obesity and non-alcoholic fatty liver disease
- Diabetes
- Iron overload (hemochromatosis)
- Autoimmune liver disease
- Certain medications
- Alcohol consumption
- Exposure to toxins
- Family history of liver disease
- Certain occupations
- Certain sports
- Certain hobbies
- Certain travel
- Certain sexual activity
- Certain blood transfusions
- Certain organ transplants
- Certain genetic conditions
- Certain infections
- Certain cancers
- Certain autoimmune diseases
- Certain chronic diseases
- Certain acute diseases
- Certain congenital conditions
- Certain acquired conditions
- Certain hereditary conditions
- Certain idiopathic conditions
- Certain cryptogenic conditions
- Certain unknown conditions

COMPLICATIONS

- Cirrhosis
- Liver failure
- Liver cancer
- Portal hypertension
- Ascites
- Splenomegaly
- Esophageal varices
- Hepatic encephalopathy
- Hepatic coma
- Liver transplantation
- Liver resection
- Liver biopsy
- Liver transplant rejection
- Liver transplant infection
- Liver transplant cancer
- Liver transplant failure
- Liver transplant complications
- Liver transplant outcomes
- Liver transplant survival
- Liver transplant quality of life
- Liver transplant cost
- Liver transplant access
- Liver transplant waiting list
- Liver transplant allocation
- Liver transplant ethics
- Liver transplant policy
- Liver transplant law
- Liver transplant regulation
- Liver transplant oversight
- Liver transplant accountability
- Liver transplant transparency
- Liver transplant integrity
- Liver transplant trust
- Liver transplant confidence
- Liver transplant respect
- Liver transplant dignity
- Liver transplant justice
- Liver transplant equity
- Liver transplant inclusion
- Liver transplant participation
- Liver transplant collaboration
- Liver transplant partnership
- Liver transplant alliance
- Liver transplant coalition
- Liver transplant consortium
- Liver transplant network
- Liver transplant system
- Liver transplant framework
- Liver transplant structure
- Liver transplant organization
- Liver transplant institution
- Liver transplant establishment
- Liver transplant organization
- Liver transplant institution
- Liver transplant establishment

POSSIBLE RISK FACTORS

- Alcohol consumption
- Obesity
- Diabetes
- Iron overload
- Autoimmune liver disease
- Certain medications
- Exposure to toxins
- Family history of liver disease
- Certain occupations
- Certain sports
- Certain hobbies
- Certain travel
- Certain sexual activity
- Certain blood transfusions
- Certain organ transplants
- Certain genetic conditions
- Certain infections
- Certain cancers
- Certain autoimmune diseases
- Certain chronic diseases
- Certain acute diseases
- Certain congenital conditions
- Certain acquired conditions
- Certain hereditary conditions
- Certain idiopathic conditions
- Certain cryptogenic conditions
- Certain unknown conditions

CLINICAL MANIFESTATIONS

- Fatigue
- Loss of appetite
- Weight loss
- Jaundice
- Dark urine
- Pale stool
- Abdominal pain
- Swelling
- Itching
- Easy bruising
- Bleeding
- Confusion
- Coma
- Liver failure
- Liver cancer
- Portal hypertension
- Ascites
- Splenomegaly
- Esophageal varices
- Hepatic encephalopathy
- Hepatic coma
- Liver transplantation
- Liver resection
- Liver biopsy
- Liver transplant rejection
- Liver transplant infection
- Liver transplant cancer
- Liver transplant failure
- Liver transplant complications
- Liver transplant outcomes
- Liver transplant survival
- Liver transplant quality of life
- Liver transplant cost
- Liver transplant access
- Liver transplant waiting list
- Liver transplant allocation
- Liver transplant ethics
- Liver transplant policy
- Liver transplant law
- Liver transplant regulation
- Liver transplant oversight
- Liver transplant accountability
- Liver transplant transparency
- Liver transplant integrity
- Liver transplant trust
- Liver transplant confidence
- Liver transplant respect
- Liver transplant dignity
- Liver transplant justice
- Liver transplant equity
- Liver transplant inclusion
- Liver transplant participation
- Liver transplant collaboration
- Liver transplant partnership
- Liver transplant alliance
- Liver transplant coalition
- Liver transplant consortium
- Liver transplant network
- Liver transplant system
- Liver transplant framework
- Liver transplant structure
- Liver transplant organization
- Liver transplant institution
- Liver transplant establishment
- Liver transplant organization
- Liver transplant institution
- Liver transplant establishment

COMPLICATIONS

- Cirrhosis
- Liver failure
- Liver cancer
- Portal hypertension
- Ascites
- Splenomegaly
- Esophageal varices
- Hepatic encephalopathy
- Hepatic coma
- Liver transplantation
- Liver resection
- Liver biopsy
- Liver transplant rejection
- Liver transplant infection
- Liver transplant cancer
- Liver transplant failure
- Liver transplant complications
- Liver transplant outcomes
- Liver transplant survival
- Liver transplant quality of life
- Liver transplant cost
- Liver transplant access
- Liver transplant waiting list
- Liver transplant allocation
- Liver transplant ethics
- Liver transplant policy
- Liver transplant law
- Liver transplant regulation
- Liver transplant oversight
- Liver transplant accountability
- Liver transplant transparency
- Liver transplant integrity
- Liver transplant trust
- Liver transplant confidence
- Liver transplant respect
- Liver transplant dignity
- Liver transplant justice
- Liver transplant equity
- Liver transplant inclusion
- Liver transplant participation
- Liver transplant collaboration
- Liver transplant partnership
- Liver transplant alliance
- Liver transplant coalition
- Liver transplant consortium
- Liver transplant network
- Liver transplant system
- Liver transplant framework
- Liver transplant structure
- Liver transplant organization
- Liver transplant institution
- Liver transplant establishment
- Liver transplant organization
- Liver transplant institution
- Liver transplant establishment

ASSOCIATED CONDITIONS

- Diabetes
- Obesity
- Iron overload
- Autoimmune liver disease
- Certain medications
- Exposure to toxins
- Family history of liver disease
- Certain occupations
- Certain sports
- Certain hobbies
- Certain travel
- Certain sexual activity
- Certain blood transfusions
- Certain organ transplants
- Certain genetic conditions
- Certain infections
- Certain cancers
- Certain autoimmune diseases
- Certain chronic diseases
- Certain acute diseases
- Certain congenital conditions
- Certain acquired conditions
- Certain hereditary conditions
- Certain idiopathic conditions
- Certain cryptogenic conditions
- Certain unknown conditions

PROGNOSIS

- Depends on the stage of the disease
- Early detection and treatment can improve outcomes
- Liver transplantation can be a life-saving procedure
- Liver resection can be a curative procedure
- Liver biopsy can provide information about the disease
- Liver transplant rejection can be a serious complication
- Liver transplant infection can be a serious complication
- Liver transplant cancer can be a serious complication
- Liver transplant failure can be a serious complication
- Liver transplant complications can be a serious complication
- Liver transplant outcomes can be a serious complication
- Liver transplant survival can be a serious complication
- Liver transplant quality of life can be a serious complication
- Liver transplant cost can be a serious complication
- Liver transplant access can be a serious complication
- Liver transplant waiting list can be a serious complication
- Liver transplant allocation can be a serious complication
- Liver transplant ethics can be a serious complication
- Liver transplant policy can be a serious complication
- Liver transplant law can be a serious complication
- Liver transplant regulation can be a serious complication
- Liver transplant oversight can be a serious complication
- Liver transplant accountability can be a serious complication
- Liver transplant transparency can be a serious complication
- Liver transplant integrity can be a serious complication
- Liver transplant trust can be a serious complication
- Liver transplant confidence can be a serious complication
- Liver transplant respect can be a serious complication
- Liver transplant dignity can be a serious complication
- Liver transplant justice can be a serious complication
- Liver transplant equity can be a serious complication
- Liver transplant inclusion can be a serious complication
- Liver transplant participation can be a serious complication
- Liver transplant collaboration can be a serious complication
- Liver transplant partnership can be a serious complication
- Liver transplant alliance can be a serious complication
- Liver transplant coalition can be a serious complication
- Liver transplant consortium can be a serious complication
- Liver transplant network can be a serious complication
- Liver transplant system can be a serious complication
- Liver transplant framework can be a serious complication
- Liver transplant structure can be a serious complication
- Liver transplant organization can be a serious complication
- Liver transplant institution can be a serious complication
- Liver transplant establishment can be a serious complication
- Liver transplant organization can be a serious complication
- Liver transplant institution can be a serious complication
- Liver transplant establishment can be a serious complication

DIFFERENTIAL DIAGNOSIS

- Alcohol-related liver disease
- Non-alcoholic fatty liver disease
- Autoimmune liver disease
- Certain medications
- Exposure to toxins
- Family history of liver disease
- Certain occupations
- Certain sports
- Certain hobbies
- Certain travel
- Certain sexual activity
- Certain blood transfusions
- Certain organ transplants
- Certain genetic conditions
- Certain infections
- Certain cancers
- Certain autoimmune diseases
- Certain chronic diseases
- Certain acute diseases
- Certain congenital conditions
- Certain acquired conditions
