Practicing The Art Of Leadership: A Problem-based Approach To Implementing The ISLLC Standards

Synopsis

This self-help book introduces a number of scenarios that incorporate the behaviors supported by the ISLLC Standards. Its effective case scenario approach prepares prospective school leaders to address actual school challenges that occur on a daily basis. In addition, it familiarizes readers with the ISSLC Standards and enables them to conduct a self-assessment relative to meeting those standards. Unlike similar texts, the author provides responses to difficult and challenging issues that are grounded in theory and supported by best practice. This enables learners to examine, compare, and make decisions about well-documented responses and in turn, apply their own ideas. Chapter topics include Leadership in Today's Schools, Organizational Influences on Leadership, Communication in Today's Schools, Decision-Making: Quality and Acceptance, Managing Conflict in Today's Schools, and Facilitating Change in Schools. For education professionals preparing for leadership roles.

Book Information

Paperback: 252 pages

Publisher: Prentice Hall; 1 edition (June 7, 2000)

Customer Reviews

"Reginald Green delivers everything the title of his book promises: Effecting a connection between theory and practice in leadership and providing an innovative strategy for doing so. However, he exceeds his promise by leading the reader through a comprehensive overview of the field of educational administration."-- John I. Goodlad, President, Institute for Educational Inquiry. "As expectations of schools increase, the job of the school principal grows ever more complex. Reginald Green's book is a valuable resource for those concerned with developing leadership for 21st

century schools that are collaborative, learning-focused, and successful with a wide range of diverse learners."-- Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University. "Dr. Green has created numerous, practical scenarios to help aspiring school leaders apply the ISLLC standards in day-to-day situations. These scenarios will encourage higher order reflections so crucial to a school leader's success, as designed, Dr. Green's activities and scenarios will be superb practice for students preparing to take the ISLLC/ETS school leaders licensure assessment. In addition to the practicality for students, the exercises provided to assist professors will enhance their classes and field experiences. I can hardly wait to put the ideas in this book to use with my students. The only problem is all the professors in our department will be competing for it!"-- Neil J. Shipman, EdD., Director, Interstate School Leaders Licensure Consortium.

PREFACE The challenges in today's schools are increasing in frequency, complexity, and intensity, requiring school leaders to enter the schoolhouse with practical experience that prepares them to take immediate and definitive action regarding multifaceted issues. The need for the beginning administrator to have practical experience is so great that many universities are changing their leadership preparation programs to reflect a more practice-oriented approach. One organization advocating this change is the Interstate School Leaders Licensure Consortium (ISLLC). The change advocated by this organization is very influential and offers a "new leadership paradigm," one that incorporates what ISLLC believes is required behavior for school leaders. Through a series of six standards, ISLLC presents a common core of knowledge, disposition, and performances that link leadership to productive schools and enhance educational outcomes. The standards represent an effort to refine the skills of school leaders and to couple leadership with effective educational outcomes (ISLLC, 1996). These standards, the recommended changes in educational leadership preparation programs, and the development of other related performance assessment instruments have influenced a renewal of the approaches used to prepare school leaders. This change is occurring in terms of classroom instruction, assessment of leadership skills and attributes for licensure, and practical application of theoretical concepts. This text is designed to support the new thrust by providing a series of scenarios that incorporate the behaviors informed by the ISLLC Standards. Also, theory is connected to practice in a manner that allows the prospective school leader an opportunity to reflect on problems and issues that exist in today's schools. A second, yet crucial, objective is to connect the standards and the literature on school leadership to scenarios, questions, and suggested solutions. In this regard, the indicators of the ISLLC Standards are

embedded in the scenarios in both a positive and negative manner, allowing the reader to view their practical implications for school leaders. *Practicing the Art of Leadership: A Problem-based Approach to Implementing the ISLLC Standards* is a compilation of scenarios and related exercises that represent the kinds of challenges and issues that surface in today's schools. It is significantly different from the traditional case study format, which probes in an in-depth manner issues that build on one another and need to be resolved. Instead, this work recognizes that definitive action is extremely critical to the success of school leaders as they function on a day-to-day basis in a setting inherently filled with complex challenges. This text is designed for use in a culminating course of a leadership preparation program. Therefore, the content is written based on the assumption that individuals who utilize it have already developed a basic knowledge of administrative theories and concepts that inform leadership behavior. However, if the text is used in an earlier course, it will need to be supplemented by a text that treats the theoretical concepts of leadership in a more comprehensive manner. The caution to be remembered in the use of this material (as with most behavioral material) is that there is no substitute for reflective reasoning. The reader must take care to select a solution based on the interrelationships between the people, the situation, the skills needed, and the environmental forces. An appropriate mix of theory, reflective thinking, and prescription must be identified. I hope the prospective school leaders and the practitioners who read this text and work through the scenarios enjoy it and find it beneficial.

Acknowledgments I hereby gratefully acknowledge all the help, encouragement, support, and sacrifice given me by my wife, Jean; my son, Reginald, who developed the charts; and my daughters, Cynthia, Stephanie, and especially Reginique, who motivated me to write this book. Obviously, the contents of a work of this nature come from a number of sources. First and foremost, I express appreciation to all my leadership students at Wright State University and The University of Memphis for their reflections, assistance, and support during the many class sessions in which these scenarios were refined. Expressions of appreciation are also given to Georgia Edwards and Shirley Johnson, District 89, Maywood, Illinois; Dr. Lirah Sabir and Dr. William Sweet (retired), Memphis (Tennessee) City Schools; James Trent, Wright State University; Katheline Ware, Cincinnati (Ohio) Public Schools; and Dr. Theodore Myers and Dr. John Petry, The University of Memphis, for reviewing the scenarios and providing me with invaluable feedback. I am deeply indebted to Dr. Glynda Cryer, Memphis (Tennessee) City Schools, who read and proofed each and every draft. In addition, the comments of the following reviewers were invaluable: Renee A. Alley, Youngstown State University; Philip Arbaugh, Western Maryland College; Dale Brubaker, University of North Carolina at Greensboro; Carol Carter-Lowery, Central Connecticut State University; Virginia Doolittle, Rowan University;

Larry W Hughes, University of Houston; Jacqueline E. Jacobs, University of South Carolina; Judith A. Kerrins, California State University, Chico; Charles E. Kline, Purdue University; Frances Kochan; Auburn University; Price M. Michael, State University of West Georgia; and Robert Millward, Indiana University of Pennsylvania. Reginald Leon Green

The reading is smooth and well labelled into topics. The scenarios are helpful for promoting thinking about what we would do in each situation. The only downside is the print is somewhat small but I am also somewhat old. If you are thinking about making the transition to a building leader (or simply want to become a more aware educator), this book is for you. RJM

This charger works well. I really like how it displays the charge left. I can get about 1 whole charge on my phone from it and it is so small and compact!

Book had good examples, and anecdotes.

This book gives you great depth in what it means to be in administration especially within the public school system working with kids.

Standard text book but it is interesting! We actually read most of it for class. It provided nice examples of real situations.

I needed to purchase this book for a class and I found it very interesting. In Massachusetts, we do not talk a lot about the ISLLC standards so this was a good book to get me up to speed with this national standard.

Needed this book short notice for my Master's class. Description of book was perfect. A few marks inside but nothing that effects the readability of the book. I would trust this seller.

This is a really good book. All principals should have this book on hand, even veterans.
