# How To Succeed In High School And Prep For College: Book 1 Of How To Succeed In High School, College And Beyond College

## Synopsis

HOW TO SUCCEED IN HIGH SCHOOL AND PREP FOR COLLEGE is ideally targeted at students entering 9th grade, and the information is valuable for students at any grade in high school, especially those planning to apply to college. And this book is NOT only for the best students. This book is expressly written for all students -- including those who will be the first in their families to attend college. Students can read this book themselves or parents, teachers and mentors can read this book and then recommend the advice to the teens they know. Phyllis Zimbler Miller has an M.B.A. from The Wharton School of the University of Pennsylvania and wrote this book after coaching high school students on their college applications. She discovered many of these teens had gaps in their applications that could have been prevented with planning done earlier in their high school careers.

## Customer Reviews

I highly recommend this book - 5 stars  
The book is ... not meant to be a comprehensive overview of the entire college application process. However, it is chock full of useful advice. -- Jon Siegelman, Ph.D. of Scorebusters.com

Phyllis Zimble Miller's book, *How to Succeed in High School and Prep for College*, is a wonderful road map and detailed guide for helping students succeed in high school and prepare for college. As a former teacher, and parent of two kids who went to college and graduate school, I can relate to the need to prepare years in advance. Her book will make both parents and students aware of the importance of high school success and early preparation for college. The book is well written, easy to read, very organized and includes specific steps for high school success and college preparation. To recap what the author says in her book's description, "This first book contains information specific to high school success and applying to colleges as well as information to help young people with interviewing, creating relationships with potential mentors, and following their passions. Exercises that build on the information are included." I would highly recommend this book for both parents and students. As the author has stressed, it is imperative that high school students prepare for college as early as the eighth grade. If you are an eighth-grade student or older, don't delay. It could make all the difference! \*\* Be sure to check out book two and three in this series.
