"All clinicians who give travel advice should be familiar with "The Yellow Book." This is the preeminent book for travel recommendations and the most up-to-date resource in print. Travel clinics should either have this book on hand or have access to the website. The fact that a new edition is available every two years reflects the necessity of staying current in this dynamic field.

This book pretty much has all the necessary information regarding health risks to travelers abroad. It is a reference book, not a novel, so it's great for looking things up but not exactly a page burner. Plan on using this a few months before departure, since some immunizations require a second dose. It's also available on Kindle, handy while traveling.

I am a travel medicine specialist and this is our "bible". I buy one for every office every two years. This edition is definitely an upgrade as the maps are more useful and the information presentation is better than in previous versions. It is always nice to provide client's with a good "visual" as to why we make certain recommendations.

Outstanding resource. A must have for providers working with international travelers. I also used some of the pertinent chapters for a presentation on parasitic infections to emergency residents and medical students. Finally, very helpful helping me prepare for a medical mission trip to Honduras. Happy reading!

Im a highly trained physician and an enthusiast traveler. This book is a must to any traveler. It does provide accurate and updated information it also includes reference ot other sources of information. Easy to read for medical personnel and for lay people.

Great information. Very useful. I know that all the information is on the website but I like the hard copy.

I am a South American traveler and stay in Paraguay and or Brazil for three months every year. The

book is very important to me.

This has always been a good book for travelers-tourists, but it did not meet my immediate need for more comprehensive country health information.

Good resource to have for the frequent traveler. Updates available on CDC website.
