# College Algebra With Modeling & Visualization Plus MyMathLab With Pearson EText -- Title-Specific Access Card Package (6th Edition)

## Synopsis

NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, and registrations are not transferable. To register for and use Pearson's MyLab & Mastering products, you may also need a Course ID, which your instructor will provide. Used books, rentals, and purchases made outside of Pearson If purchasing or renting from companies other than Pearson, the access codes for Pearson's MyLab & Mastering products may not be included, may be incorrect, or may be previously redeemed. Check with the seller before completing your purchase. For courses in College Algebra. This package includes MyLab Math. Showing why math matters Gary Rockswold doesn't just mention real-world examples; he teaches mathematical concepts through those applications. For example, if we look at Facebook usage over time, what might that tell us about linear growth and predictions? In this way, students learn the concepts in the context of the world they know, which leads to better understanding and retention. From there, the author shows a connection between application, modeling, and visualization. Rockswold is known for presenting the concept of a function as a unifying theme, with an emphasis on the rule of four (verbal, graphical, numerical, and symbolic representations). The 6th Edition emphasizes conceptual understanding with new in-chapter features and assignment options, while at the same time providing tools to empower instructors to make their classroom more active through collaboration and group work.

Personalize learning with MyLab Math MyLab, Math is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them absorb course material and understand difficult concepts. The 6th Edition of College Algebra with Modeling & Visualization continues to expand the comprehensive auto-graded exercise options. The pre-existing exercises were carefully reviewed, vetted, and improved using aggregated student usage and performance data over time. In addition, MyLab Math includes new options to support conceptual learning, visualization, and student preparedness. NOTE: This package includes a MyLab Math access kit created specifically for Rockswold, College Algebra with Modeling & Visualization 6/e. This title-specific access kit provides access to the Rockswold, College Algebra with Modeling & Visualization 6/e accompanying MyLab course ONLY. 0134763823 / 9780134763828 College Algebra with Modeling & Visualization plus MyLab Math with eText --

Access Card Package, 6/e      Package consists of: 0134418042 / 9780134418049 College Algebra with Modeling & Visualization 0134753321 / 9780134753324 MyLab Math with Pearson eText - Standalone Access Card - for College Algebra with Modeling & Visualization

## Book Information

Hardcover: 896 pages

Publisher: Pearson; 6 edition (May 14, 2017)

Language: English

ISBN-10: 0134763823

ISBN-13: 978-0134763828

Product Dimensions: 8.8 x 1.3 x 11.1 inches

Shipping Weight: 3.8 pounds (View shipping rates and policies)

Best Sellers Rank: #43,404 in Books (See Top 100 in Books) #77 in Books > Science & Math > Mathematics > Popular & Elementary > Pre-Calculus #257 in Books > Textbooks > Science & Mathematics > Mathematics > Algebra & Trigonometry #282 in Books > Science & Math > Mathematics > Pure Mathematics > Algebra

## Customer Reviews

Gary Rockswold has taught mathematics, computer science, and physical science at a wide variety of levels, including high school, undergraduate, and graduate students for over 30 years. He received his bachelor's degree from St. Olaf College and his Ph.D. in applied mathematics from Iowa State University. He has been a principal investigator of parallel computing at the Minnesota Supercomputer Institute and is an emeritus professor of mathematics at Minnesota State University, Mankato. He is an author and has published numerous mathematics textbooks for Pearson Education at both the developmental and collegiate levels. His motivation for writing is to make mathematics more inclusive for a greater number of students by presenting mathematics in a contextual, meaningful way.
