What Do You See?: Painting The Picture In Hospice Documentation For Eligibility

Synopsis

Oftentimes, documentation to prove hospice eligibility can be tricky. Generalization and lack of specific details can result in non payment or repayment of claims. My purpose in creating this pocket guide is to help nurses, physicians and other disciplines be able to accurately and thoroughly document hospice decline. Everything you need is at the drop of the hand in a small convenient size guide that can easily be carried with you anywhere.

Michelle has been a nurse for 23 years with the last 15 years in hospice. She has held many leadership positions and currently serves as a hospice state administrator. She has a passion for hospice and providing resources to help educate other on end of life issues. Her philosophy is to operate out of a spirit of excellence in everything that you do and you will be successful.

Guide? This is a teeny, tiny pamphlet that promises to "list several forms of appropriate versus inappropriate documentation." In fact there are only three examples shown and they aren't anything that you couldn't come up with on your own. This "guide" measures about 6"x4" and is about 3mm wide (tiny). Most pages are written in bullet point style with only about 8-10 sentences on the page. I know the description said it is small enough to take with you but really, I have many nursing books that I can carry with me. This is nothing more than a pamphlet. I was looking for something that would help me with documenting my crisis care patients decline as I often go in at end of life. This guide doesn't help with that. Not sure who would benefit from this guide, it's not appropriate for Hospice admission nurses, too little info for a case manager and not helpful for crisis care. I would

have given 1 star but I gave an extra 1 for the effort. It is a much needed guide, if only she would have went into much more detail and written a book.

very generic

This book is written for very beginning hospice nurses and is not exclusive for those seasoned in end of life. This is only a tool for beginners learning to document for hospice. As an educator, I see it time after time nurses not knowing where to start. I do recommend updating the book to show that it is primarily for beginners and possibly another addition for those seasoned nurses.
