Hawaiian Plants And Animals Coloring Book (Dover Nature Coloring Book)

Synopsis

Climate and topography have greatly influenced the evolution of animal and plant life in the Hawaiian Islands. Sheltered canyons, steep precipices, and wide variations in rainfall and temperature have produced a vast assortment of shrubs, trees, flowering plants, animals, birds, and sea life. Unfortunately, many species of Hawaiian flora and fauna are rapidly disappearing. For this coloring book, Y. S. Green has rendered 44 finely detailed illustrations capturing a rich cross-section of the islands' characteristic plant and animal life, depicting such plants as the mango, breadfruit, coconut palm, red ginger, tree fern, prickly poppy, and pineapple, as well as such exotic forms of animal and insect life as the cone-headed grasshopper, slipper lobster, house gekko, trilling swordtail cricket, and the damselfly. Captions identify plants and animals on each page of this carefully researched and handsomely illustrated volume, sure to delight coloring book enthusiasts and nature lovers of all ages.

Customer Reviews

Pics are too cluttered for my taste.

The pictures are amazing, beautiful, and large enough for a 7 year old to work with. Very educational also. Happy I selected this book will be enjoyed many years after it has been completely colored.

This is a great resource for teaching children about the native Hawaiian species. I have to remind

my students to read as well as color, but they tend to remember the information better this way.

Nice Coloring Book. A lot of helpful information.))))

Very thin

I bought this book for fun to use for a children's art class I am teaching on Hawaiian flora and fauna. I don't recognize any plants and animals in this book. I was hoping for Happy Face Spiders, Lobster Claw Flowers, and other fun things for children to draw and color but these are obscure and uninteresting. I couldn't use the book at all.

It was ok

Love this book, beautiful artwork, would like to see more of Hawaii.
