Founded in 1947, Hal Leonard Corporation has become the worlds largest print music publisher, representing some of the greatest songwriters and artists of all time. We are proud to publish titles of interest to all musicians as well as music lovers, from songbooks and instructional titles to artist biographies and instrument price guides to books about the music industry and all the performing arts.

The enormous composition project i'm engaged in requires thousands of pages of orchestral score paper, all handwritten the old school way. For me, using digital software would distance myself emotionally from this impassioned work and just look and feel mechanically blah and cheap, not to mention all the downtime futzing around with silly silicon glitches. A pencil eraser works just fine. Computer software works 'fine' when it works and is, 'they say', much faster...yeah...but what does one's true essence give up? Like your soul? i need to be as close to this music as my heart is, otherwise what's the point? This paper is always consistently of high quality and the named orchestral instruments with their clef signs save enormous time. Yes, i can hear those who swear by 'the silicon edge' now claiming how 'great' digital is...until the grid goes down and the erroneously named 'cloud' isn't a cloud at all...just like so much other silicon delusion. When other composers'

works, only in digital format, disappear into their clouds i'll still have an actual reality i can touch.

This manuscript paper has all the instruments in the orchestra printed, so if you are writing for anything besides full orchestra, then don't buy.

I purchased this for my son who enjoys music composition, and he loved it and had the following to say about it: "The paper is large enough to accommodate a standard orchestra template with clearly defined staves for each section/instrument which is a godsend. Most other blank orchestral paper that I've seen has been on paper that's too small and smudged the staff lines of more than one instrument/section together hindering the ability of the composer to write effectively or easily. The book also has guidelines inside the cover providing the dynamic ranges of each section as well as their respective clef symbols for those who are less familiar with writing for orchestra. Overall, it's a fantastic buy for the price and I highly recommend it to anyone looking to begin or continue any efforts in scoring for orchestra."
