Customer Reviews

Good quality, nice visuals. We are using this with our homeschooled 1st grader. We supplement with our own knowledge and books from the library.

These DK Workbooks are simply excellent. They have a full page of gold stickers to help keep our son motivated for each lesson. They have large lettering that is easy to read, and appropriate for a

2nd grade level. My son likes to do these on his own and at his own pace with the easy-to-follow directions for each lesson. We have purchased every DK Workbook for 1st and 2nd grade now. Highly recommended to bridge the school break over the summer. Buy them for your child, you won't regret it, and they will thank you later! These books also meet the common core state standards.

Kids learn many life skills with this book. Highly recommended.

This book is just ok. It's impossible to find geography books for 2nd grade or younger, and my son really loves geography and anything to do with maps and compasses so I really wanted to get him a book and this is all I could find. I've never really been fond of the DK workbooks, and this is about the same. Ready for 3rd grade so he can really get into it.

Good book

Thank you

DK workbooks are the best homeschool workbooks in my opinion.

I wish they had more information... We actually had to use other sources of info just to find answers... I wish they went in depth a little more on each lesson. I do love the gold stars they provide for the finished lessons...
