Synopsis

Health on Demand and Health and Wellness for Life provide professors teaching general-ed health courses the option to customize their student textbooks to match their syllabi. With a custom Health on Demand text, your students pay for only the material you'll actually cover in class, plus you can match the text's content to the unique needs of your setting. The standard text, Health and Wellness for Life, offers a ready-made option for those looking for a textbook that covers all the essential personal health topics for the general student population. Both options feature content developed by 15 veteran health educators and organized into a cohesive course text by Human Kinetics, a publisher with more than 30 years of experience in providing top-quality information resources to the fields of health and physical education and to the various kinesiology subdisciplines. The standard text includes 16 chapters of the topics most often covered in a general-education health course. Or you can choose from a total of 23 chapters to ensure your text includes the material that is most important for your students. For those electing to customize a text, new chapters will be offered as they are developed to expand your options even further.

I didn't have a choice about buying this for my class, but it was in great condition and the web content was helpful.

The layout is simple as well as the reading. I will sell it to a student in the next class. I don't have any use for it now that the class is over. I would recommend it for young students.

Impossible to use for an online course as no page numbers are provided. Good content however
