# New York Atlas And Gazetteer

## Synopsis

Wouldn't it be nice to always have exactly the right kind of map, whatever your needs may be? You will, with the uniquely versatile DeLorme Atlas & Gazetteer Series. These topographic atlases cover individual states with the most comprehensive detail available, including back roads, backwater lakes and streams, boat ramps, forests, wetlands, trailheads, campgrounds, public lands, prime hunting and fishing spots, and countless landmarks and points of interest. You'll also find a wealth of information on everything from family outings to wilderness adventures. The Atlas & Gazetteer is ideal for outdoor recreation, business travel, home or office reference, and countless other uses. New York Gazetteer categories » Campgrounds » Family Outings » Fishing » Hunting » Outdoor Adventures » Recreation Areas » Unique Natural Features Suggested Uses » In-vehicle for everyday reference » Exploring back roads » Outdoor recreation preparation and navigation » Business travel » Planning vacations and leisure activities » Armchair journeys

## Customer Reviews

DeLorme has been directly responsible for many of the major technological advances made in the mapping industry over the past 30 years.

I try to hike in the Catskills 2-3 times each month. The iOS maps app is great for getting me to the proper GPS point for the trailheads. The trouble is the return trip: in the remote areas I hike, it's unlikely that I'll have data service when it comes time to head home. No data service = no navigation. Having a USA road atlas in the car is great for getting from state to state or city to city,

but it does you no good on small country roads. The scale of this map, however, does let you see those smaller roads. This is in my car and stays in my car. It's a beautifully rendered set of maps that map geeks will just love. And now I can find my way home.

If you are not familiar with this and have a habit of wandering, DO NOT BUY! This book of wonder will get you into places that no one else has stepped foot in years! If you ever wondered where that dirt road goes... or must replicate "as the crow flies", this will show you. Now if you feel you have a need for a book of every road and trail and hill in the state buy this! I have been lucky enough to have these around in some shape or form for decades and can say that these are worth every penny. If you are one of those people that can't use a map unless it is read to you from a lil electronic box, this will be a book full of abstract art.

My husband is a map freak and he loves this atlas. Noticed his old one from the same company was starting to fall apart after years and years of use so I thought it was time for an upgrade. Hands down it was his favorite gift this holiday season. He likes it because it has so many features of topography and hiking trails. He is an avid camper so it was perfect.

I have already worn out two New York Atlas and Gazetteer's over the years. Even though I use a GPS, I find that the Atlas gives me those little roads that often don't appear on the Garmin. Thanks to DeLorme for still making an excellent product.

These are great for planning road trips especially trips that will take you off the major routes or out where cell reception and data plans don't work well. They have a lot of detail. I was recently out in the country on a little one lane dirt trail that amazingly enough was labeled as a road and was in this book. It was nice to be able to plan out a way to cut diagonally across the county to get where I needed to go instead of back tracking to a major route.

These Gazetteers are amazing! I own them for NY, VT, NH and ME. Fabulous! They provide info and details that go beyond what's available online and via smartphone apps. I use these to find waterfalls and to learn about state parks and destinations. The extra info they provide about natural features/highlights are valuable too. The only downside - they're big if you want to carry them around or keep them handy in your car.

I bought this to launch small boats and canoes on local waters. The small scale gives no more detail than a road map, and it is missing several launch ramps that I have already used, and others that are listed on different sources. I will keep it in the car anyway, but I am disappointed.

More of a road map than a useful topographical map. I don't think it would be good for any kind of orienteering. Nice quality, and tons of details, but its not much more than a road atlas.
