A book with less than 50 pages should not be called a bible. There aren't even any pictures. I could probably make the same book myself for less than \$10

This is a very basic book. If a person has any knowledge of crystals this book is a total waste of time. The title is completely misleading.

Very informative quick read. I enjoyed it and liked the knowledge it provided. I liked how there were pictures, this helps with identification of the crystals that much easier. Thank you and God Bless.

Not a bad little book all in all, good explanations for the novice

This was a VERY disappointing purchase. For one, it honestly looks like someone printed this out at home and sold it to me. I work in a bindary, so I know this was a very lazy job. For two, this "book" is a pamphlet. Nothing more. Save your money, DO NOT BUY THIS.

Title is very misleading. Only 38 pages. Definitely not worth 10 bucks. But on the other hand pretty ok information, good for kids to start with.... Honestly wish I read the reviews before purchasing.

This book told me what I needed to know about crystals. I think if you're newly learning about crystals, then this would be a great book for you.

Like the crystal list. Not too much information, concise. It could have been longer, but it does have relevant information.
